SOFTWARE DEVELOPMENT / RWANDA

Nzabana Merci

FULL-STACK SOFTWARE DEVELOPER

React / TypeScript / JavaScript / Node.js

RWANDA | GITHUB | PORTFOLIO

PROFILE

Software Development graduate of Giheke TSS (2026), based in Rwanda, with a growing focus on full-stack web development. I build practical web experiences using React, TypeScript and JavaScript, with additional experience in Node.js, REST APIs and database tools. I bring a hardworking, curious and disciplined approach to learning, solving problems and turning ideas into useful products.

SELECTED PROJECTS

Agasobanuye Free

PERSONAL PROJECT

Entertainment platform focused on movie, series and TV discovery. Frontend built with React and TypeScript, with Supabase used for backend services and data. Designed around categories, episodes, trailers and viewing links, with community features in its roadmap.

Spend Wise

TEAM PROJECT

Group project focused on helping users record and manage expenses. Contributed to a practical, user-oriented solution and collaborated on a short project presentation.

Expense Tracker

PERSONAL PROJECT

A React and TypeScript project for recording and tracking personal expenses, built to make everyday spending easier to review.

XM Bakery

WEB PROJECT

A React and TypeScript storefront concept demonstrating responsive interface design and practical front-end development.

EDUCATION

Giheke TSS

2026

Advanced Level - Software Development (SOD)

TECHNICAL TOOLKIT
